Is a Used Computer a Bargain?

ABSTRACT: Members of Infosystems' New York Users Council discussed the **buying** and **selling** of **used** computers. All **members** of the council agreed that used computers can provide outstanding cost benefits. Most also agreed that applications rather than hardware drives the computer system purchasing decision. When a buyer is locked into a manufacturer, acquisition must be made in the most **cost - effective** way. Advantages of leasing include the relatively low cost and the subsequent ability to trade equipment. Although the market for resale of International Business Machines (IBM) equipment is quite good, this is not true for any other types of equipment.
